

Having disclosed the invention, what is claimed follows:

1. (Currently Amended) A method for preparing a removable decorative design for mounting on a wall, the method comprising:
 - (a) applying glue to a top surface of a polymeric crease resistant backing material;
 - (b) adhering with the glue a desired fabric design pattern to the backing material top surface;
 - (c) stitching with thread an outline of the ~~designed~~ desired design pattern onto the backing material top surface;
 - (d) cutting the desired design pattern away from the backing material not covered by the threaded outline of the desired design pattern; and
 - (e) applying double sided sticky tape to a back surface of the backing material so that the desired design can be stuck to a wall surface and easily removed therefrom.
2. (Original) The method for preparing a removable decorative design according to claim 1 wherein the double sided sticky tape is removed and replaced after multiple uses.
3. (Original) The method for preparing a removable decorative design according to claim 1 wherein a voice or music chip is mounted on a top surface of the decorative design by stitching a fabric cover over the chip.

4. (Original) The method for preparing a removable decorative design according to claim 1 wherein the polymeric crease resistant backing material is provided as polypropylene.

5. (Original) The method for preparing a removable decorative fabric design according to claim 1 wherein the design pattern is provided as a cotton fabric.
